

Haroon Ayaz

Data Engineer / Software Developer

Birmingham, United Kingdom | +44 (0) 77-868-72193 | [linkedin.com/in/haroonayaz](https://www.linkedin.com/in/haroonayaz) | github.com/Kyojur0

PROFESSIONAL SUMMARY

Analytically minded software and data-focused professional with experience in Python, SQL, dashboards, and workflow automation. Proven ability to process structured data, improve data quality, and support decision-making through reporting systems. Currently completing an MSc in Advanced Computer Science and working within NHS England in a high-volume environment requiring accuracy, communication, and handling of sensitive data. Seeking an Associate Data Analyst role to further develop skills in data analysis, BI, and machine learning.

EDUCATION

University of Chester

Chester, United Kingdom

Master's degree, Advanced Computer Science

September 2024 – March 2026

Dissertation: Using Machine Learning Algorithms to Predict Stock Market Trends

Grade: Merit

Relevant Courses: Algorithms, Digital Forensics, Penetration Testing, UX/UI, Embedded Systems

National University of Computer and Emerging Sciences

Islamabad, Pakistan

Bachelor of Science, Computer Science

September 2019 – June 2023

Final Year Project: Synthetic Urdu Speech Generation via Deep NeuralNets

Grade: Merit

Relevant Courses: Programming Fundamentals, Object Oriented Programming, Databases, Operating Systems, Data Mining

WORK EXPERIENCE

NHS England

Birmingham, United Kingdom

Clinical Administration Technology Specialist

February 2025 – Present

- Managed patient referrals and endoscopy scheduling using Unity and Lorenzo systems, coordinating 80+ weekly bookings and 100+ monthly referrals across multiple consultant lists.
- Collaborated with clinical staff and patients to resolve routine system issues, ensuring accurate data handling and timely escalations in high-volume environment.
- Supported departmental technology infrastructure, maintaining system reliability and data integrity for sensitive patient information.

Stinxel Technologies

Islamabad, Pakistan

Software Developer

September 2023 – September 2024

- Co-led Telegram ERC-20 launch tool using web3.py and solcx, automating 18 Ethereum launches with Etherscan verification in 1-2 minutes.
- Built Django/PostgreSQL backend with Celery/Redis, automating Uniswap v3 liquidity and cutting manual stock checks by 8 hours/week, reducing stock-outs by 25%.
- Developed Next.js/Tailwind dashboards with shadcn/ui, clearing 15% slow-moving stock in Q1 through real-time analytics.
- Migrated 16 months Excel data to normalized SQL schema and managed AWS deployment, achieving 99%+ uptime post-launch.
- Implemented encrypted wallet handling and live transaction tracking, supporting 15+ test pool launches with zero downtime.

DTools AI

(Hybrid) Islamabad, Pakistan

Junior Software Developer

December 2022 – August 2023

- Built JavaFX desktop crawler aggregating Fiverr/Freelancer/Upwork gigs using TF-IDF ranking with JSoup/SQLite, returning results in 1 second.
- Developed Python monitor for 12 product pages with Telegram alerts and AWS infrastructure (EC2/S3/RDS) under \$10/month.

SKILLS & INTERESTS

Skills: Python, SQL, Django, PostgreSQL, Next.js, React, JavaFX, web3.py, AWS, Docker, Redis, Celery, Tailwind CSS, FastAPI

Interests: Machine Learning, Blockchain, Data Engineering, System Automation, Full-Stack Development, Algorithm Design
